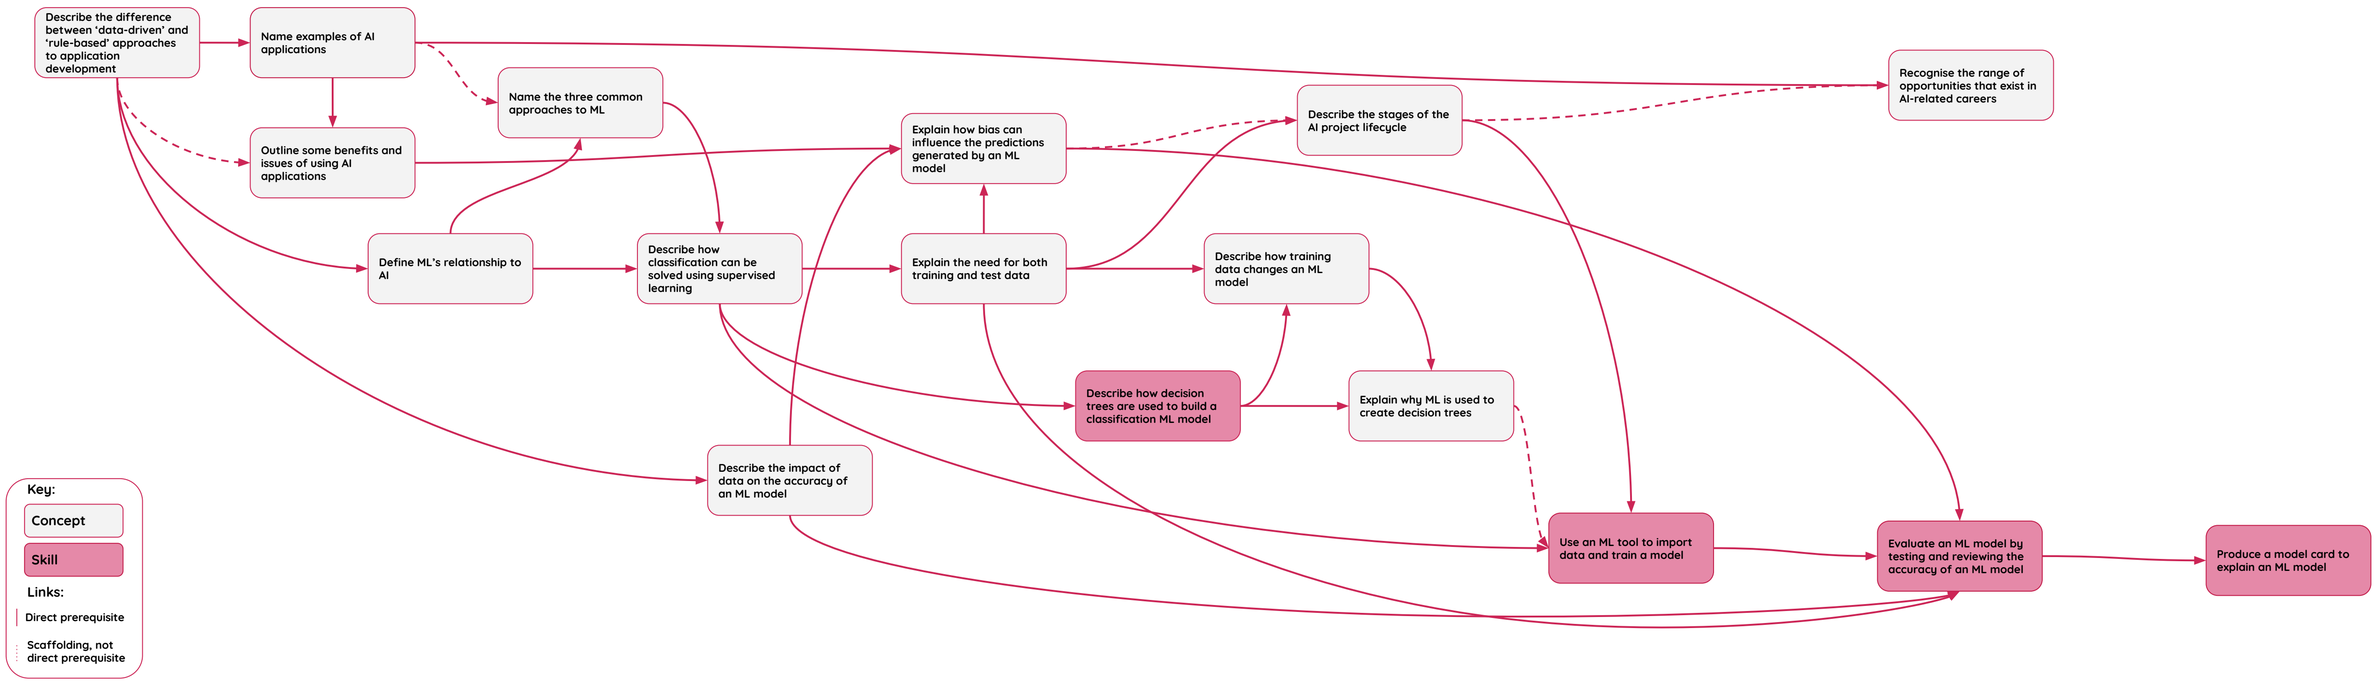
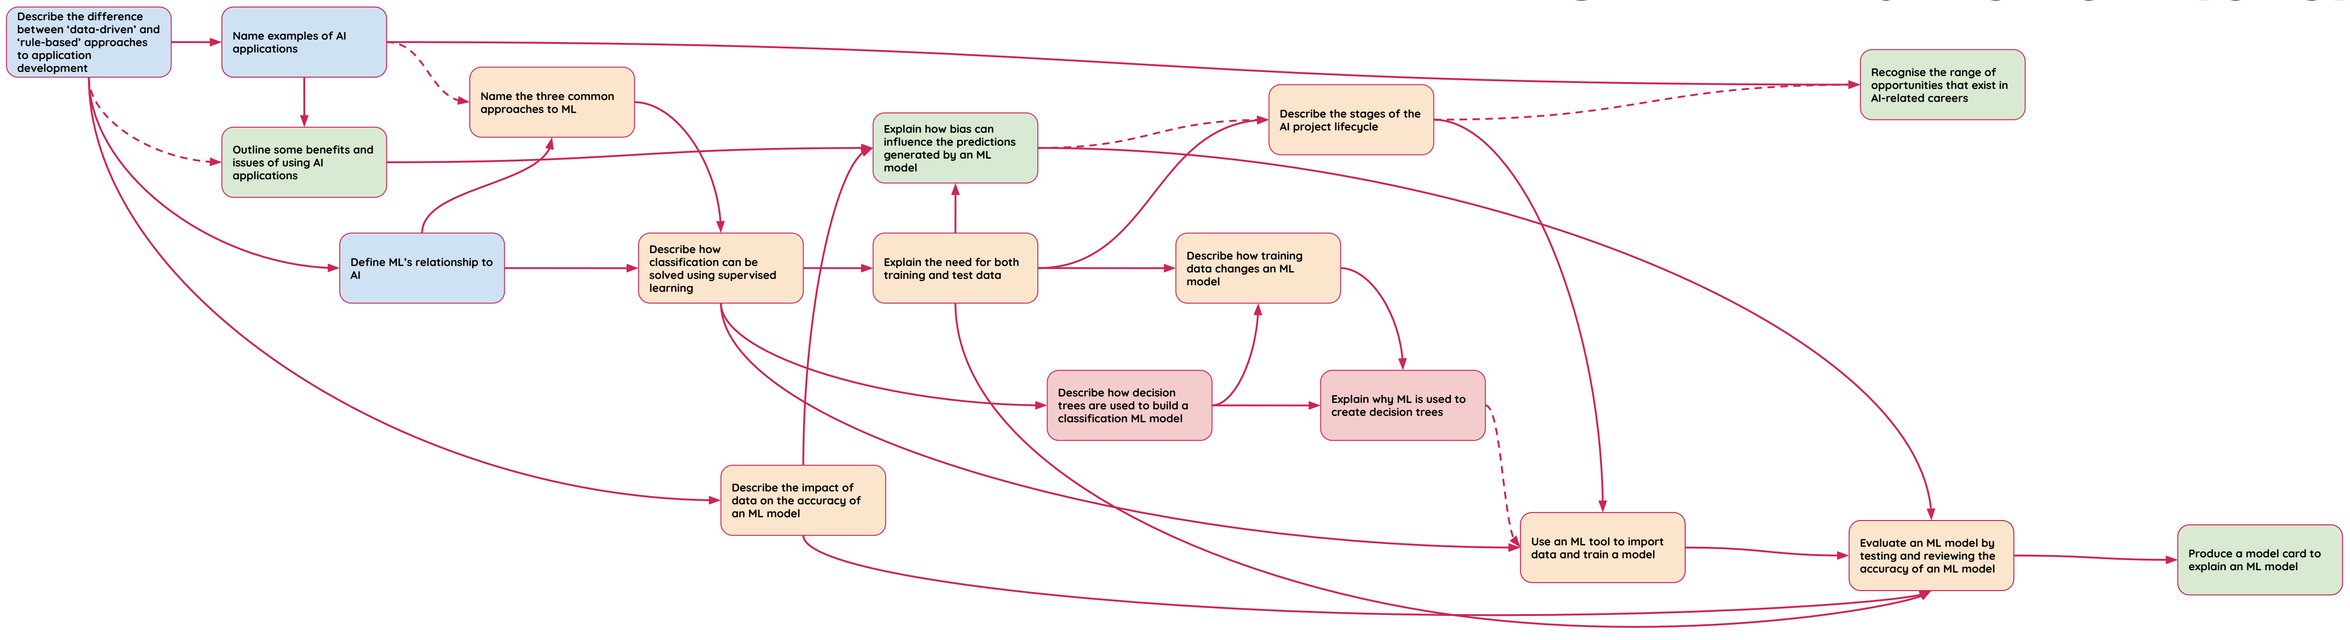
Experience AI Lessons

Concepts and skills



SEAME framework levels



Social and **E**thical considerations	e.g. knows about the idea of bias in machine learning (ML), understands that artificial intelligence (AI) is not magic and machines are not self-deterministic
Applications	e.g. knows some systems that include AI components, can design an application that includes ML image recognition
Models	e.g. can explore an ML model that was created by someone else, understands the process for selecting and cleaning data needed to train a simple ML model
Engines	e.g. can explain how a decision tree can be used to classify items, can explain in simple terms how a neuron works with relationship to learning about ML

The SEAME framework for learning and teaching AI and ML (a revised version of Waite & Curzon, 2018; see also rpf.io/blog-seame-framework)
